It helps the fuel to last more and the vapors that escape will not destroy the environment. But the biggest problem is Find one that works. The cheap (\$ 20 or more now) do not have vents, so it takes for an eternity to fill the tank of their Cã © Sped tractor. The cheap are also weak and the boqueros are broken after the first year. Well, I have found two brands that work very well! I have both m coffers and use them all the time. They are ventilated inside the mouthpiece, so the fuel is poured rapidly but seals firmly when it is not in use. It will give Amazon links for two size. I suggest buying the size so that it does not keep more than a month of fuel in the house. ? Mango on the back so it is very easy to use and hang when it spills in its fuel tank. A good size for Cã © Sped and Zero Turners. If you have a problem with gas retention can southern is a great can. It is very code of using and built well. Sureecan á € "Can gas with rotating spout. Fuel stabilizer: When I go to the gas station and understanding. I always put fuel stabilizer in the storage tank. It helps maintain fresh fuel and some stabilizers also clean their carbohydrate and fuel system without spoiling it. There are many good brands but I have used Seafoam for years and it has always worked well. Use 2 tablespoons per fuel gallon. Seafoam also recommends K100 other fuel stabilizers to check: fuel stabilizers I have helped you?
